

MD AKRAM

Full Stack Engineer — Web Applications & GenAI

mdakram12022002@gmail.com | +91 8863064946 | Hyderabad, Telangana | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Engineer with hands-on experience building **AI-powered applications** using **React.js**, **Node.js**, **FastAPI**, and **TypeScript**. Experienced in building **LLM-powered workflows**, **LangGraph agents**, **Agentic AI**, and **RAG pipelines** using **pgvector**, with experience integrating **Gemini**, **OpenAI**, and **Groq**. Skilled in **AI automation**, **Vector Search**, **Semantic Search**, **Workflow Automation**, **RESTful APIs**, and **API Integration**, turning real-world problems into working products, debugging, and cloud deployment using **Docker**, **Azure**, and **GitHub Actions**.

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js, RESTful API Design, RESTful API Testing, FastAPI, JWT Authentication, RBAC, Middleware Architecture, API Rate Limiting, Input Validation, Error Handling.
- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Next.js, Tailwind CSS, Framer Motion, HTML5/CSS3, React Hooks, REST API Integration, Debugging.
- **AI & GenAI:** LangGraph, Agentic AI, LLM Integration (Gemini, OpenAI, Groq), RAG, Vector Search (pgvector), Semantic Search, AI Automation, Workflow Automation.
- **Database:** MongoDB (Proficient), PostgreSQL, Redis, Schema Design, Query Optimization, Compound Indexing, Vector Database.
- **Tools & Cloud:** Git, GitHub, Postman, GitHub Actions (CI/CD), Docker, Azure Web App, Code Review, Agile/Scrum.
- **Languages:** C++, JavaScript, TypeScript, Python, SQL.

EXPERIENCE

Diyos Infotech Pvt. Ltd. (Hyderabad, Telangana)

March 2026 – April 2026

Frontend Engineer Intern – FaME Enterprise Resource Planning (ERP) System

- Engineered **33+ production-ready UI components** across 6+ core modules (Client Management, Payroll, Invoicing, Reporting) using **React.js** and **TypeScript**, implementing complex **form validation** with real-time **error handling** for PAN, PF, ESI, and HSN codes.
- Designed responsive AddClient screens with live address mirroring, reducing form completion time by **20%**; integrated **REST API**-driven receipt tables and resolved Inventory Module **blank-screen** bugs, reducing support tickets by **25%**.
- Collaborated with **cross-functional** backend and QA teams to optimize **UI rendering** across **70–100%** zoom levels, ensuring consistent UX and saving **1.5 hours** of weekly debugging effort for the support team.

PROJECTS

StudyPoint – EdTech Platform | MERN, Redux, Razorpay, Cloudinary | Live | GitHub

Feb 2025

- Delivered a full-featured EdTech platform using **MVC architecture** and **Redux state management**. Integrated **Razorpay** for payments, **Cloudinary** for video uploads, and **Nodemailer** for confirmations, reducing checkout steps from **5 to 3** and supporting **100+ users**.
- Implemented **19+** secure RESTful APIs with **JWT authentication**, **OTP verification**, and **RBAC**. Deployed frontend to Netlify and backend to **Azure App Service** using **Docker** and **GitHub Actions** for **CI/CD**. Optimized the **payment** flow using **React Hooks**.

Healthcare CRM Platform | React.js, FastAPI, PostgreSQL, Docker, LangGraph | GitHub

Present

- Orchestrated a **LangGraph** state machine with **8 Pydantic-validated tools** for entity extraction, voice-note summarization, and semantic follow-up suggestions, converting unstructured input into structured **CRM** fields via **Groq-hosted LLMs** across **5+ core screens**.
- Established secure **FastAPI** with **JWT**, **RBAC** (rep/manager/guest), and audit logging, plus a **pgvector**-powered **RAG** pipeline for grounded AI responses. Developed **React/Redux** frontend, containerized with **Docker**, and deployed on **Azure App Service** through **GitHub Actions CI/CD** with health checks.

KnowBase – Knowledge Management Platform | Next.js, Node.js, Express.js, MongoDB | Live | GitHub

Feb 2026

- Architected a full-stack AI platform with modular service-layer architecture, integrating **LLM APIs (Gemini)** for automated summarization and semantic search across **1,000+ documents**. Leveraged **MongoDB text indexes** and **batch processing**, reducing search latency by **30%** and achieving **95%** relevance score.
- Created **8+ RESTful APIs** with **JWT authentication**, **rate limiting**, and input validation. Designed modular architecture supporting **5+ core modules**, reducing feature development time by **21%**.

EDUCATION

Technocrats Institute of Technology

Aug 2022 – Jun 2026

Bachelor of Technology in Computer Science – AI & ML

Bhopal, Madhya Pradesh

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) | Credential
- Generative AI Certificate – Microsoft & LinkedIn Career Essentials | Credential
