

MD AKRAM

Software Engineer — Full Stack Developer

mdakram12022002@gmail.com | +91 8863064945 | Hyderabad, Telangana | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with hands-on experience building software applications, frontend interfaces, backend services, **RESTful APIs**, and database-driven systems using **JavaScript, TypeScript, React.js, Node.js, FastAPI, MongoDB**, and **PostgreSQL**. Strong foundation in **C++**, **Data Structures & Algorithms**, **problem solving**, and **Object-Oriented Programming**. Experienced in developing and deploying applications using **Git, Docker, Azure Container Instances (ACI)**, and **GitHub Actions**, with skills in **API integration, debugging, performance optimization**, and **Agile**.

TECHNICAL SKILLS

- **Languages:** C++, SQL, JavaScript, TypeScript, Python, Object-Oriented Programming, Data Structures & Algorithms.
- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Next.js, Tailwind CSS, Framer Motion, HTML5/CSS3, React Hooks, Component-Based Architecture, REST API Integration, Debugging, Responsive Web Design.
- **Backend:** Node.js, Express.js, RESTful API Design, FastAPI, JWT Authentication, RBAC, Middleware Architecture, API Rate Limiting, Input Validation, Error Handling.
- **Database:** MongoDB, PostgreSQL, Redis, SQL, Schema Design, Query Optimization.
- **GenAI:** LangGraph, LLM Integration (Gemini, OpenAI, Groq API), RAG, Vector Search (pgvector), Semantic Search.
- **Integration & Development:** Razorpay, Cloudinary, Nodemailer, OAuth, API Integration, API Testing, Postman.
- **Tools & Cloud:** Git, GitHub Actions (CI/CD), Docker, Azure Container Instances (ACI), SDLC, Code Review.

EXPERIENCE

Diyos Infotech Pvt. Ltd. (Hyderabad, Telangana)

16 Mar 2026 — 28 Apr 2026

React Developer Intern — FaME Enterprise Resource Planning (ERP) System

- Resolved **33+** development tickets across **6+** core modules (Client Management, Payroll, Invoicing, Reporting) using **React.js** and **TypeScript**, implementing complex **form validation** with real-time **error handling** for PAN, PF, ESI, and HSN code validations.
- Developed responsive **AddClient** screens with live address mirroring, reducing form completion time by **20%**; integrated **REST API**-driven receipt tables and resolved Inventory Module **blank-screen** bugs, reducing support tickets by **25%**.
- Collaborated with **cross-functional** backend and QA teams to optimize **UI rendering** across **70–100%** zoom levels, ensuring consistent user experience and saving **1.5 hours** of weekly **debugging** effort for the support team.

PROJECTS

StudyPoint — EdTech Platform | MERN, MVC, Docker, GitHub Actions, Azure | Live | GitHub

Feb 2025

- Delivered a full-featured EdTech platform using **MVC architecture** and **Redux state management**. Integrated **Razorpay** for payments, **Cloudinary** for video uploads, and **Nodemailer** for confirmations, reducing checkout steps from **5 to 3** and supporting **100+** users.
- Implemented **19+** secure RESTful APIs with **JWT authentication, OTP verification**, and **RBAC**. Deployed frontend to Vercel and backend to **Azure Container Instances (ACI)** using **Docker** and **GitHub Actions** for CI/CD. Optimized the payment flow using **React Hooks**.

Healthcare CRM Systems | React.js, FastAPI, PostgreSQL, Docker, LangGraph | GitHub

ongoing

- Orchestrated a **LangGraph** state machine with **8 Pydantic-validated tools** for entity extraction, voice-note summarization, and semantic follow-up suggestions, converting unstructured input into structured **CRM** fields via **Groq-hosted LLMs** across **5+** core screens.
- Established secure **FastAPI** with **JWT, RBAC** (rep/manager/guest), and audit logging, plus a **pgvector**-powered **RAG** pipeline for grounded AI responses. Developed **React/Redux** frontend, containerized with **Docker**, and deployed on **Azure Container Instances (ACI)** through **GitHub Actions CI/CD** with health checks.

KnowBase AI — Knowledge Platform | Next.js, Node.js, Express.js, Redis, MongoDB | Live | GitHub

Feb 2026

- Engineered a full-stack AI platform with modular architecture, implementing **JWT authentication**, protected routes, input validation, and secure API workflows across **1,000+** documents. Leveraged **MongoDB indexing** and **Redis caching** for optimized data access and guest sessions, reducing search latency by **30%**.
- Created **8+** **RESTful APIs** with **JWT authentication**, rate limiting, input validation, and structured error handling. Designed modular public, guest, and protected workflows using **Redis TTL-based sessions** across **5+** core modules, improving maintainability and reducing feature development time by **21%**.

EDUCATION

Technocrats Institute of Technology

Aug 2022 — Jun 2026

Bachelor of Technology in Computer Science — AI & ML

Bhopal, Madhya Pradesh

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) | Credential
- Generative AI Certificate — Microsoft & LinkedIn Career Essentials | Credential
