

MD AKRAM

Full Stack Developer — Software Testing & Backend

mdakram12022002@gmail.com | +91 8863064946 | Hyderabad, Telangana | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Developer with hands-on experience building and deploying **web applications, RESTful APIs, and backend services** using **JavaScript, TypeScript, Python, React.js, Node.js, Express.js, and FastAPI**. Strong foundation in **Data Structures & Algorithms, computer science fundamentals, problem solving, and debugging**. Experienced in **API testing, input validation, error handling, authentication, and database-driven applications**, with hands-on use of **Postman, Git, Docker, and GitHub Actions CI/CD**. Experienced collaborating with **frontend, backend, and QA teams** to identify issues, validate application behavior, and deliver reliable software.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, TypeScript, SQL.
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Software Design, Debugging.
- **Testing:** API Testing, REST API Validation, Postman, Input Validation, Error Handling, Defect Debugging, Test Scenarios, Functional Testing.
- **Backend:** Node.js, Express.js, FastAPI, RESTful API Design, API Integration, JWT Authentication, RBAC, Middleware, Rate Limiting.
- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Hooks, HTML5/CSS3, Tailwind CSS.
- **Databases:** MongoDB, PostgreSQL, Redis, SQL, Schema Design, Database Normalization, Indexing, Query Optimization.
- **Engineering & Tools:** Git, GitHub, Code Review, Agile/Scrum, Docker, GitHub Actions, CI/CD, Azure App Service.
- **AI Integration:** LLM Integration, Gemini, OpenAI, Groq, LangGraph, RAG, Vector Search (pgvector).

EXPERIENCE

Diyos Infotech Pvt. Ltd. (Hyderabad, Telangana)

March 2026 – April 2026

Frontend Engineer Intern – FaME Enterprise Resource Planning (ERP) System

- Engineered **33+ production-ready UI components** across 6+ core modules using **React.js** and **TypeScript**, implementing complex **form validation** and real-time **error handling** for PAN, PF, ESI, and HSN codes.
- Integrated **REST API**-driven workflows and resolved Inventory Module **blank-screen** bugs, reducing support tickets by **25%**; developed responsive AddClient screens that reduced form completion time by **20%**.
- Collaborated with **backend and QA teams** to debug and optimize application behavior across **70–100%** zoom levels, ensuring consistent UX and saving **1.5 hours** of weekly debugging effort.

PROJECTS

StudyPoint – EdTech Platform | *MERN, Redux, Razorpay, Cloudinary* | Live | GitHub

Feb 2025

- Delivered a full-stack EdTech platform using **MVC architecture** and **Redux state management**. Integrated **Razorpay** for payments, **Cloudinary** for video uploads, and **Nodemailer** for confirmations, reducing checkout steps from **5 to 3** and supporting **100+ users**.
- Implemented **19+** secure RESTful APIs with **JWT authentication, OTP verification, and RBAC**; validated API workflows using **Postman** and deployed the application using **Docker, Azure App Service, and GitHub Actions CI/CD**.

Healthcare CRM Platform | *React.js, FastAPI, PostgreSQL, Docker, LangGraph* | GitHub

Present

- Developed a full-stack CRM application using **React, FastAPI, and PostgreSQL**, implementing a **LangGraph** workflow with **8 Pydantic-validated tools** for entity extraction, voice-note summarization, and semantic follow-up suggestions.
- Built secure **RESTful APIs** with **JWT, RBAC, and audit logging**, and implemented a **pgvector-powered RAG** pipeline. Tested backend workflows and API behavior, then containerized the application using **Docker** and deployed it on **Azure App Service** through **GitHub Actions CI/CD**.

KnowBase – Knowledge Management Platform | *Next.js, Node.js, Express.js, MongoDB* | Live | GitHub

Feb 2026

- Architected a full-stack knowledge platform with modular service-layer architecture, integrating **Gemini LLM** for automated summarization and semantic search across **1,000+ documents**; leveraged MongoDB text indexes and batch processing to reduce search latency by **30%**.
- Created **8+** **RESTful APIs** with **JWT authentication, rate limiting, and input validation**; tested API workflows and designed modular architecture supporting **5+ core modules**, reducing feature development time by **21%**.

EDUCATION

Technocrats Institute of Technology

Aug 2022 – Jun 2026

Bachelor of Technology in Computer Science – AI & ML

Bhopal, Madhya Pradesh

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) | Credential
- Generative AI Certificate – Microsoft & LinkedIn Career Essentials | Credential
